NOTE: These labor force data are supplied by the U.S. Department of Labor.

HIGHLIGHTS California's seasonally adjusted unemployment rate for September was 5.1 percent, up from the 4.5 percent in August. A year ago, in September, the rate was 5.1 percent. During September in California, seasonally adjusted employment increased by 10,000 over the month while unemployment increased by 84,000. The number of job losers increased from 303,500 in August to 310,900 in September. The number of job leavers decreased by 11,300 during the month. The national civilian seasonally adjusted unemployment rate for September was 5.3 percent, up from the 5.2 percent in August.

Total nonagricultural wage and salary employment, not seasonally adjusted, increased by 153,800 from 12,342,100 in August to 12,495,900 in September. This increase was due primarily to the return of 99,300 education employees as schools reopened, and a gain of 42,800 workers following the end of a trade dispute in the communications industry. Other sectors that reported increases were services with 20,900 additional jobs, construction with 5,900, and wholesale and retail trade with 3,700. After adjusting the data for seasonality and the return of workers in the communications industry, there was only a small gain (less than 6,000) in total employment for the month. Since September 1988, total nonagricultural wage and salary employment has increased by 328,400, a gain of 2.7 percent during this period.

Prepared in cooperation with the Bureau of Labor Statistics and the Employment and Training Administration of the U.S. Department of Labor by the Labor Market Information Division, Economic Information Group, P.O. Box 942880, Sacramento, CA 94280-0001.

*Data supplied by the U.S. Department of Labor from their Current Population Survey. No comparable data are available for areas within California. The sample upon which the data in Table 2 is based was reduced in April 1988. The result has been volatile monthly unemployment estimates for specific labor market groups. Therefore, data show a THREE-MONTH MOVING AVERAGE instead of monthly data. For example, July's data are an average of May, June, and July.

[a] Total labor force by place of residence, including workers involved in trade disputes. Employment includes self-employed, unpaid family , and domestic workers.

[b] Range as shown is at the 90% level of confidence.

NOTE: These labor force data are supplied by the U.S. Department of Labor.

HIGHLIGHTS California's seasonally adjusted unemployment rate for October was 4.8 percent, down from the 5.1 percent in September. A year ago, in October, the rate was 5.0 percent. During October in California, seasonally adjusted employment increased by 51,000 over the month while unemployment decreased by 46,000. The number of job losers increased from 310,900 in September to 335,100 in October. The number of job leavers decreased by 26,600 during the month. The national civilian seasonally adjusted unemployment rate for October was 5.3 percent, the same as in September.

NOTE: October labor market estimates contained in this publication do not reflect the effects of the earthquake that occurred on October 17. These estimates are based on data for the week of October 8-14.

Total nonagricultural wage and salary employment, not seasonally adjusted, increased by 74,700 from 12,499,400 in September to 12,574,100 in October. The largest increase in employment was in the government sector with a gain of 58,200 jobs, as many teachers returned to the classroom. This increase, however, was less than seasonally expected. Other sectors that registered increases were wholesale and retail trade with 11,500 additional jobs, services with 11,400, and construction with 3,300. After adjusting the data for seasonality, increases in employment were recorded in all sectors except government and mining. Since October 1988 total wage and salary employment has increased by 321,100, a gain of 2.6 percent over the year. In manufacturing, average weekly earnings increased to $458 and average weekly hours decreased to 40.6 during the month of September.

*Data supplied by the U.S. Department of Labor from their Current Population Survey. No comparable data are available for areas within California. The sample upon which the data in Table 2 is based was reduced in April 1988. The result has been volatile monthly unemployment estimates for specific labor market groups. Therefore, data show a THREE-MONTH MOVING AVERAGE instead of monthly data. For example, July's data are an average of May, June, and July.

FOOTNOTES TO TABLES

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees of the City and County of San Francisco.

E. Includes employees of State and local public schools.

F. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that *these are not wage rates* but are averages of the gross earnings. Figures for the current month are preliminary and are subject to revision.

[a] Total labor force by place of residence, including workers involved in trade disputes. Employment includes self-employed, unpaid family, and domestic workers.

[b] Range as shown is at the 90% level of confidence.

NOTE: These labor force data are supplied by the U.S. Department of Labor.

HIGHLIGHTS California's seasonally adjusted unemployment rate for November was 5.0 percent, up from the 4.8 percent in October. A year ago, in November, the rate was 5.2 percent. During November in California, seasonally adjusted employment decreased by 52,000 over the month while unemployment increased by 35,000. The number of job losers increased from 335,100 in October to 353,900 in November. The number of job leavers increased by 22,800 during the month. The national civilian seasonally adjusted unemployment rate for November was 5.4 percent, up from the 5.3 percent in October.

Total nonagricultural wage and salary employment, not seasonally adjusted, increased by 55,700 from 12,569,900 in October to 12,625,600 in November. The largest increase in employment was in the retail trade sector with a gain of 35,300 jobs. Other sectors that registered increases were government with 17,500 additional jobs; services with 9,000; finance, insurance, and real estate with 2,800; and transportation and public utilities with 1,300. After adjusting the data for seasonality, increases in employment were recorded in all sectors except mining. From a statewide employment perspective, the October 17 earthquake seems to have had only a modest effect, except that we know businesses closed in the Bay Area Counties. Employment in the construction sector was approximately 3,500 higher than seasonally expected. Since November 1988, total wage and salary employment has increased by 314,800, a gain of 2.6 percent over the year. In manufacturing statewide, average weekly earnings remained at $458 while average weekly hours decreased to 40.5 during the month.

Prepared in cooperation with the Bureau of Labor Statistics and the Employment and Training Administration of the U.S. Department of Labor by the Labor Market Information Division, Economic Information Group, P.O. Box 826880, Sacramento, CA 94280-0001.

*Data supplied by the U.S. Department of Labor from their Current Population Survey. No comparable data are available for areas within California. The sample upon which the data in Table 2 is based was reduced in April 1988. The result has been volatile monthly unemployment estimates for specific labor market groups. Therefore, data show a THREE-MONTH MOVING AVERAGE instead of monthly data. For example, July's data are an average of May, June, and July.

FOOTNOTES TO TABLES

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees of the City and County of San Francisco.

E. Includes employees of State and local public schools.

F. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that *these are not wage rates* but are averages of the gross earnings. Figures for the current month are preliminary and are subject to revision.

[a] Total labor force by place of residence, including workers involved in trade disputes. Employment includes self-employed, unpaid family, and domestic workers.

[b] Range as shown is at the 90% level of confidence.

NOTE: These labor force data are supplied by the U.S. Department of Labor.

HIGHLIGHTS California's seasonally adjusted unemployment rate for December was 5.3 percent, up from the 5.0 percent in November. A year ago, in December, the rate was 4.7 percent. During December in California, seasonally adjusted employment decreased by 104,000 over the month while unemployment increased by 34,000. The number of job losers decreased from 353,900 in November to 321,200 in December. The number of job leavers increased by 4,900 during the month. The national civilian seasonally adjusted unemployment rate for December was 5.3 percent.

Total nonagricultural wage and salary employment, not seasonally adjusted, increased by 60,800 from 12,634,300 in November to 12,695,100 in December. The largest increase in employment was in the retail trade sector with a gain of 53,200 jobs. Other sectors that registered increases were services with 9,100 additional jobs, finance, insurance, and real estate with 3,400, transportation and public utilities with 900, and mining with 100. After adjusting the data for seasonality, increases in employment were recorded in all major sectors except transportation and public utilities, and mining. Since December 1988, total nonagricultural wage and salary employment has increased by 316,800, a gain of 2.6 percent over this period. Average weekly earnings in manufacturing increased to $465 while average weekly hours increased to 41.1 during the month of November.

*Data supplied by the U.S. Department of Labor from their Current Population Survey. No comparable data are available for areas within California. The sample upon which the data in Table 2 is based was reduced in April 1988. The result has been volatile monthly unemployment estimates for specific labor market groups. Therefore, data show a THREE-MONTH MOVING AVERAGE instead of monthly data. For example, July's data are an average of May, June, and July.

TABLE 3

EARNINGS AND HOURS* OF PRODUCTION AND RELATED WORKERS IN MANUFACTURING IN CALIFORNIA

Average Weekly Earnings			Average Hours Per Week			Average Hourly Earnings		
NOV 1989	OCT 1989	NOV 1988	NOV 1989	OCT 1989	NOV 1988	NOV 1989	OCT 1989	NOV 1988
$465.25	$456.75	$446.63	41.1	40.6	40.9	$11.32	$11.25	$10.92

*Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. These are not wage rates but are averages of gross earnings. Data are preliminary and subject to change.

HIGHLIGHTS The numbers in this report reflect the most recent population and seasonal adjustments.

California's seasonally adjusted unemployment rate for January was 5.2 percent, down from the 5.3 percent in December. A year ago, in January, the rate was 5.0 percent. During January in California, seasonally adjusted employment decreased by 120,000 over the month while unemployment decreased by 16,000. The national civilian seasonally adjusted unemployment rate for January was 5.3 percent, the same as in December.

Total nonagricultural wage and salary employment, not seasonally adjusted, decreased by 206,100 from 12,688,700 in December to 12,482,600 in January. As expected, the largest decrease in employment was in the retail trade sector with a loss of 93,700 jobs. All other major sectors also registered decreases: services with 39,500 fewer jobs, construction with 30,200; manufacturing with 19,500; transportation and public utilities with 6,300; government with 5,500; finance, insurance and real estate with 4,900; and mining with 500. After adjusting the data for seasonality, moderate increases in employment were recorded in all major sectors. Since January 1989, total nonagricultural wage and salary employment has increased by 287,500, a gain of 2.4 percent over the year. Average weekly earnings in manufacturing increased to $470 and average weekly hours increased to 41.4 during the month of December.

During the reference week in January, the total number of weeks claimed for unemployment insurance fell by 4,800 from 341,900 in December to 337,100 in January. The number of initial claims rose to 63,500 during January. The Disability Insurance Fund balance fell to approximately $777.5 million at the end of November.

*Data supplied by the U.S. Department of Labor from their Current Population Survey. No comparable data are available for areas within California. The sample upon which the data in Table 2 is based was reduced in April 1988. The result has been volatile monthly unemployment estimates for specific labor market groups. Therefore, data show a THREE MONTH MOVING AVERAGE instead of monthly data. For example, July's data are an average of May, June, and July.

Dear "Statistical Supplement" Recipient:

I am pleased to announce that beginning with this issue of the "Statistical Supplement" of the California Labor Market Bulletin, the industry detail has been expanded for the non-manufacturing industries. In cooperation with the federal Bureau of Labor Statistics, we have implemented the 1987 Standard Industrial Classification (SIC) system which provides the new industry breakouts.

This is the first change of the published industry structure since the conversion to the 1972 SIC during 1975. While the SIC code will not change again in the near future, the industry data published in this report may change. Our goal is to make the published industry data more reflective of the growth and decline of California industries by adding newly significant industries and deleting others. To assist us in this effort, we would appreciate your comments regarding the new industry structure as well as any future recommendations for additions and deletions. As the quality of the sample of California employers (upon which we base these estimates) permits, we will make changes, additions, and deletions on an annual basis beginning with the January 1991 published estimates. Your comments will assist us in future revision of the employer sample and changes in the published industry data.

I hope you find the "Statistical Supplement" a useful document. Please direct your comments to the Economic Information Group, Labor Market Information Division, P.O. Box 826880, Sacramento, CA 94280-0001, or call Spencer Fields at (916) 427-4681.

Sincerely,

Jeanne Barnett

Prepared in cooperation with the Bureau of Labor Statistics and the Employment and Training Administration of the U.S. Department of Labor by the Labor Market Information Division, Economic Information Group, P.O. Box 826880, Sacramento CA 94280-0001, (916) 445-9380.

FOOTNOTES TO TABLES

* Data not published on the 1972 SIC code. This is a new composition of the industries included or the industry is new.

** Data for 1988 and 1989 are not comparable with prior data because of the SIC code revisions (changed from the 1972 SIC code to the 1987 SIC code).

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees at the city and county of San Francisco.

E. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that these are not wage rates but are averages of the gross earnings. Figures for the current month are preliminary and are subject to revision.

NOTE: These labor force data are supplied by the U.S. Department of Labor.

HIGHLIGHTS Wage and salary employment data, Figure 4, in this report are based on the 1987 Standard Industrial Classification (SIC) code. Data in prior reports reflected the 1972 SIC code.

California's seasonally adjusted unemployment rate for February was 4.9 percent, down from the 5.2 percent in January. A year ago, in February, the rate was 5.1 percent. During February in California, seasonally adjusted employment increased by 50,000 over the month while unemployment decreased by 45,000. The number of job losers decreased from 381,700 in January to 352,400 in February. The number of job leavers decreased by 23,500 during the month. The national civilian seasonally adjusted unemployment rate for February was 5.3 percent, the same as in January.

Total nonagricultural wage and salary employment, not seasonally adjusted, increased by 67,000 from 12,547,700 in January to 12,614,700 in February. The largest increase in employment was in the services sector with a gain of 34,200 jobs. Other major sectors that registered increases were government with 21,100 additional jobs; manufacturing with 12,000; construction with 6,100; finance, insurance, and real estate with 4,000; transportation and public utilities with 1,100 and mining with 400. A decrease was recorded in retail trade with a loss of 16,900 jobs. After adjusting the data for seasonality, moderate increases in employment were recorded in all major sectors. Since February 1989, total nonagricultural wage and salary employment has increased by 283,800, a gain of 2.3 percent over the year. During the month of January, average weekly earnings and average weekly hours worked in manufacturing decreased to $451 and 40.0, respectively.

Prepared in cooperation with the Bureau of Labor Statistics and the Employment and Training Administration of the U.S. Department of Labor by the Labor Market Information Division, Economic Information Group, P.O. Box 826880, Sacramento, CA 94280-0001.

*Data supplied by the U.S. Department of Labor from their Current Population Survey. No comparable data are available for areas within California. The sample upon which the data in Table 2 is based was reduced in April 1988. The result has been volatile monthly unemployment estimates for specific labor market groups. Therefore, data show a THREE-MONTH MOVING AVERAGE instead of monthly data. For example, July's data are an average of May, June, and July.

FOOTNOTES TO TABLES

* Data not published on the 1972 SIC code. This is a new composition of the industries included or the industry is new.

** Data for 1988 and 1989 are not comparable with prior data because of the SIC code revisions (changed from the 1972 SIC code to the 1987 SIC code).

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees at the city and county of San Francisco.

E. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that these are not wage rates but are averages of the gross earnings. Figures for the current month are preliminary and are subject to revision.

[a] Total labor force by place of residence, including workers involved in trade disputes. Employment includes self-employed, unpaid family, and domestic workers.

[b] Range as shown is at the 90% level of confidence.

NOTE: These labor force data are supplied by the U.S. Department of Labor.

HIGHLIGHTS California's seasonally adjusted unemployment rate for March was 5.2 percent, up from the 4.9 percent in February. A year ago, in March, the rate was 4.6 percent. During March in California, seasonally adjusted employment increased by 63,000 over the month while unemployment increased by 54,000. The number of job losers increased from 352,400 in February to 395,600 in March. The number of job leavers increased by 23,300 during the month. The national civilian seasonally adjusted unemployment rate for March was 5.2 percent, down from the 5.3 percent in February.

Total nonagricultural wage and salary employment, not seasonally adjusted, increased by 91,500 from 12,639,300 in February to 12,730,800 in March. The largest increase in employment was in the services sector with a gain of 34,700 jobs. In fact, all major sectors registered increases in March, as employment in government grew by 16,600; trade by 13,900; manufacturing by 10,500; construction by 10,400; finance, insurance, and real estate by 3,500; transportation and public utilities by 1,500; and mining by 400. After adjusting the data for seasonality, increases in employment were recorded in all major sectors except transportation and public utilities. Since March 1989, total nonagricultural wage and salary employment has increased by 288,900, a gain of 2.3 percent over the year. During the month of February, average weekly earning and average weekly hours worked in manufacturing increased to $466 and 40.3, respectively.

*Data supplied by the U.S. Department of Labor from their Current Population Survey. No comparable data are available for areas within California. The sample upon which the data in Table 2 is based was reduced in April 1988. The result has been volatile monthly unemployment estimates for specific labor market groups. Therefore, data show a THREE-MONTH MOVING AVERAGE instead of monthly data. For example, July's data are an average of May, June, and July.

FOOTNOTES TO TABLES

* Data not published on the 1972 SIC code. This is a new composition of the industries included or the industry is new.

** Data for 1988 and 1989 are not comparable with prior data because of the SIC code revisions (changed from the 1972 SIC code to the 1987 SIC code).

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees at the city and county of San Francisco.

E. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that these are not wage rates but are averages of the gross earnings. Figures for the current month are preliminary and are subject to revision.

[a] Total labor force by place of residence, including workers involved in trade disputes. Employment includes self-employed, unpaid family, and domestic workers.

[b] Range as shown is at the 90% level of confidence.

NOTE: These labor force data are supplied by the U.S. Department of Labor.

HIGHLIGHTS California's seasonally adjusted unemployment rate for April was 5.4 percent, up from the 5.2 percent in March. A year ago, in April, the rate was 5.3 percent. During April in California, seasonally adjusted employment increased by 34,000 over the month while unemployment increased by 30,000. The number of job losers decreased from 395,600 in March to 383,900 in April. The number of job leavers decreased by 26,700 during the month. The national civilian seasonally adjusted unemployment rate for April was 5.4 percent, up from the 5.2 percent in March.

Total nonagricultural wage and salary employment, not seasonally adjusted, increased by 44,400 from 12,732,600 in March to 12,777,000 in April. The largest increase in employment was in the government sector with a gain of 22,900 jobs. Nearly all of this increase was in the federal government component, as the U.S. Department of Commerce hired temporary help to assist in the decennial census. Other major sectors that registered increases in April were services with 8,500 additional jobs; construction with 7,400; wholesale and retail trade with 3,700; transportation and public utilities with 2,800; finance, insurance, and real estate with 800; and mining with 300. Reductions in the electronics and defense industries were principal reasons for a loss of 2,000 jobs in the manufacturing sector. After adjusting these data for seasonality, all major sectors grew except manufacturing. Since April 1989, total nonagricultural wage and salary employment has increased by 310,900, a gain of 2.5 percent over the year. During the month of March, average weekly earnings and average weekly hours worked in manufacturing increased to $462 and 40.6, respectively.

Prepared in cooperation with the Bureau of Labor Statistics and the Employment and Training Administration of the U.S. Department of Labor by the Labor Market Information Division, Economic Information Group, P.O. Box 826880, Sacramento, CA 94280-0001.

*Because of a relatively small sample, the monthly estimates for data in Table 2 do not always appear to reflect real labor market conditions. Therefore, these figures are a three-month moving average instead of monthly data. For example, July's data are an average of May, June, and July. August's data are an average of June, July, and August.

FOOTNOTES TO TABLES

* Data not published on the 1972 SIC code. This is a new composition of the industries included or the industry is new.

** Data for 1988 and 1989 are not comparable with prior data because of the SIC code revisions (changed from the 1972 SIC code to the 1987 SIC code).

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees at the city and county of San Francisco.

E. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that these are not wage rates but are averages of the gross earnings. Figures for the current month are preliminary and are subject to revision.

[a] Total labor force by place of residence, including workers involved in trade disputes. Employment includes self-employed, unpaid family, and domestic workers.

[b] Range as shown is at the 90% level of confidence.

NOTE: These labor force data are supplied by the U.S. Department of Labor.

HIGHLIGHTS California's seasonally adjusted unemployment rate for May was 5.4 percent, the same as the 5.4 percent in April. A year ago, in May, the rate was 5.3 percent. During May in California, seasonally adjusted employment increased by 117,000 over the month while unemployment increased by 7,000. The number of job losers decreased from 383,900 in April to 378,600 in May. The number of job leavers decreased by 800 during the month. The national civilian seasonally adjusted unemployment rate for May was 5.3 percent, down from the 5.4 percent in April.

Total nonagricultural wage and salary employment, not seasonally adjusted, increased by 69,800 from 12,756,200 in April to 12,826,000 in May. The largest increase in employment was in the government sector with a gain of 41,400 jobs. Most of this increase was in the federal government component, as the U.S. Department of Commerce retained temporary workers to assist in the decennial census. Other major sectors that registered increases in May were wholesale and retail trade with 14,500 additional jobs; construction with 7,800; manufacturing with 3,400; transportation and public utilities with 3,200; finance, insurance, and real estate with 2,300; and mining with 400. The largest decrease in jobs occurred in the services sector because of the layoff of tax preparation workers in the business services component. After adjusting the data for seasonality, all major sectors recorded increases in employment except manufacturing, construction, and transportation and public utilities. This is the second consecutive month that seasonally adjusted employment in manufacturing decreased. Since May 1989, total nonagricultural wage and salary employment has increased by 318,800, a gain of 2.5 percent over the year. During the month of April, average weekly earnings and average weekly hours worked in manufacturing decreased to $448 and 39.6, respectively. These decreases were due mainly to the reduction of overtime hours in the aerospace industry.

Prepared in cooperation with the Bureau of Labor Statistics and the Employment and Training Administration of the U.S. Department of Labor by the Labor Market Information Division, Economic Information Group, P.O. Box 826880, Sacramento, CA 94280-0001.

*Because of a relatively small sample, the monthly estimates for data in Table 2 do not always appear to reflect real labor market conditions. Therefore, these figures are a three-month moving average instead of monthly data. For example, July's data are an average of May, June, and July. August's data are an average of June, July, and August.

FOOTNOTES TO TABLES

* Data not published on the 1972 SIC code. This is a new composition of the industries included or the industry is new.

** Data for 1988 and 1989 are not comparable with prior data because of the SIC code revisions (changed from the 1972 SIC code to the 1987 SIC code).

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees at the city and county of San Francisco.

E. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that these are not wage rates but are averages of the gross earnings. Figures for the current month are preliminary and are subject to revision.

[a] Total labor force by place of residence, including workers involved in trade disputes. Employment includes self-employed, unpaid family, and domestic workers.

[b] Range as shown is at the 90% level of confidence.

NOTE: These labor force data are supplied by the U.S. Department of Labor.

HIGHLIGHTS California's seasonally adjusted unemployment rate for June was 4.9 percent, down from the 5.4 percent in May. A year ago, in June, the rate was 5.5 percent. During June in California, seasonally adjusted employment increased by 75,000 over the month while unemployment decreased by 75,000. The number of job losers decreased from 378,600 in May to 332,400 in June. The number of job leavers decreased by 4,100 during the month. The national civilian seasonally adjusted unemployment rate for June was 5.2 percent, down from the 5.3 percent in May.

Total nonagricultural wage and salary employment, not seasonally adjusted, increased by 59,100 from 12,815,400 in May to 12,874,500 in June. The largest increase in employment was in the trade sector with a gain of 22,900 jobs; most of this increase was in the retail trade component. Other major sectors that registered increases were services with 13,300 additional jobs; construction with 11,400; manufacturing with 9,300; transportation and public utilities with 3,100; finance, insurance, and real estate with 3,000; and mining with 300. The education components within the government sector recorded a loss of 12,000 jobs, as many teachers began their summer break. After adjusting the data for seasonality, all major sectors registered decreases except services, wholesale and retail trade, and transportation and public utilities. The decrease in the manufacturing sector was spread throughout many of the components in durable goods; this is the third consecutive month that seasonally adjusted employment in manufacturing has decreased. Since June 1989, total nonagricultural wage and salary employment has increased by 304,900, a gain of 2.4 percent over the year. During the month of May, average weekly earnings and average weekly hours worked in manufacturing increased to $462.92 and 40.5, respectively.

Prepared in cooperation with the Bureau of Labor Statistics and the Employment and Training Administration of the U.S. Department of Labor by the Labor Market Information Division, Economic Information Group, P.O. Box 826880, Sacramento, CA 94280-0001.

*Because of a relatively small sample, the monthly estimates for data in Table 2 do not always appear to reflect real labor market conditions. Therefore, these figures are a three-month moving average instead of monthly data. For example, July's data are an average of May, June, and July. August's data are an average of June, July, and August.

*Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. These are not wage rates but are averages of gross earnings. Data are preliminary and subject to change.

FOOTNOTES TO TABLES

* Data not published on the 1972 SIC code. This is a new composition of the industries included or the industry is new.

** Data for 1988 and 1989 are not comparable with prior data because of the SIC code revisions (changed from the 1972 SIC code to the 1987 SIC code).

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees at the city and county of San Francisco.

E. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that these are not wage rates but are averages of the gross earnings. Figures for the current month are preliminary and are subject to revision.

[a] Total labor force by place of residence, including workers involved in trade disputes. Employment includes self-employed, unpaid family, and domestic workers.

[b] Range as shown is at the 90% level of confidence.

NOTE: These labor force data are supplied by the U.S. Department of Labor.

HIGHLIGHTS California's seasonally adjusted unemployment rate for July was 5.1 percent, up from the 4.9 percent in June. A year ago, in July, the rate was 5.2 percent. During July in California, seasonally adjusted employment decreased by 78,000 over the month while unemployment increased by 28,000. The number of job losers increased from 332,400 in June to 381,100 in July. The number of job leavers increased by 31,100 during the month. The national civilian seasonally adjusted unemployment rate for July was 5.5 percent, up from the 5.2 percent in June.

Total nonagricultural wage and salary employment, not seasonally adjusted, decreased by 110,300 from 12,870,100 in June to 12,759,800 in July. This decrease was primarily due to a reduction of 136,500 in state and local education, as many teachers began their summer vacations. Additional losses in the government sector were the result of a decrease in the number of workers helping with the decennial census. The largest increase in employment occurred in the construction sector with a gain of 5,300 jobs. Other sectors that registered increases were transportation and public utilities with 4,500 additional jobs; wholesale and retail trade with 3,800; manufacturing with 2,200; and finance, insurance, and real estate with 2,100. After adjusting July's data for seasonality, employment grew in all major nonagricultural sectors except construction and manufacturing. Job losses in the manufacturing sector were spread throughout most of the components in durable goods, as layoffs occurred in the aerospace and automobile industries; this marks the fourth consecutive month that seasonally adjusted employment in manufacturing has decreased. Since July 1989, total nonagricultural wage and salary employment has increased by 304,800, a gain of 2.4 percent over this period. During June, average weekly earnings and average weekly hours worked in manufacturing increased to $468.05 and 40.7, respectively.

*Because of a relatively small sample, the monthly estimates for data in Table 2 do not always appear to reflect real labor market conditions. Therefore, these figures are a three-month moving average instead of monthly data. For example, July's data are an average of May, June, and July. August's data are an average of June, July, and August.

FOOTNOTES TO TABLES

* Data not published on the 1972 SIC code. This is a new composition of the industries included or the industry is new.

** Data for 1988 and 1989 are not comparable with prior data because of the SIC code revisions (changed from the 1972 SIC code to the 1987 SIC code).

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees at the city and county of San Francisco.

E. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that these are not wage rates but are averages of the gross earnings. Figures for the current month are preliminary and are subject to revision.

[a] Total labor force by place of residence, including workers involved in trade disputes. Employment includes self-employed, unpaid family, and domestic workers.

[b] Range as shown is at the 90% level of confidence.

NOTE: These labor force data are supplied by the U.S. Department of Labor.

HIGHLIGHTS California's seasonally adjusted unemployment rate for August was 5.4 percent, up from the 5.1 percent in July. A year ago, in August, the rate was 4.6 percent. During August in California, seasonally adjusted employment increased by 15,000 over the month while unemployment increased by 50,000. The number of job losers decreased from 381,100 in July to 364,800 in August. The number of job leavers decreased by 17,800 during the month. The national civilian seasonally adjusted unemployment rate for August was 5.6 percent, up from the 5.5 percent in July.

Total nonagricultural wage and salary employment, not seasonally adjusted, increased by 9,500 from 12,773,000 in July to 12,782,500 in August. The largest increase in employment was in the manufacturing sector with a gain of 13,500 jobs. Other sectors that registered increases were services with 12,700 additional jobs; construction with 5,000; wholesale and retail trade with 3,800; finance, insurance, and real estate with 2,000; and transportation and public utilities with 1,700. After adjusting August's data for seasonality, employment grew in all major nonagricultural sectors except construction and manufacturing. Job losses in the manufacturing sector were spread throughout most of the components in durable goods; this marks the fifth consecutive month that seasonally adjusted employment in manufacturing has decreased. Since August 1989, total wage and salary employment, not seasonally adjusted, has increased by 350,400, a gain of 2.8 percent over the year. During July, average weekly earnings and average weekly hours worked in manufacturing decreased to $467 and 40.4, respectively.

*Because of a relatively small sample, the monthly estimates for data in Table 2 do not always appear to reflect real labor market conditions. Therefore, these figures are a three-month moving average instead of monthly data. For example, July's data are an average of May, June, and July. August's data are an average of June, July, and August.

FOOTNOTES TO TABLES

* Data not published on the 1972 SIC code. This is a new composition of the industries included or the industry is new.

** Data for 1988 and 1989 are not comparable with prior data because of the SIC code revisions (changed from the 1972 SIC code to the 1987 SIC code).

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees at the city and county of San Francisco.

E. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that these are not wage rates but are averages of the gross earnings. Figures for the current month are preliminary and are subject to revision.
